About us:

ABTECH SOLUTIONS, a division of Gulf Group Holding established nearly three decades ago in RAK, U.A.E., has evolved into a prominent provider of IT services, distinguished by its innovative approach and robust technical capabilities. As a privately-owned entity, our Chairman's fervor for technology has consistently fueled our emergence with new innovations and ideas. Today, ABTECH SOLUTIONS stands as the most esteemed and relied-upon innovation hub in RAK, offering comprehensive IT services (hardware, software, and ELV solutions) serving clients across the U.A.E.

We pride ourselves on our leadership in delivering specialized solutions in ICT, ELV, and retail security services throughout the U.A.E. Through innovation, we assist customers in finding optimal solutions. Our company values—Integrity, Teamwork, Attitude, Performance, and Passion—serve as the foundation of our commitment to exceptional customer service and guide our daily operations.
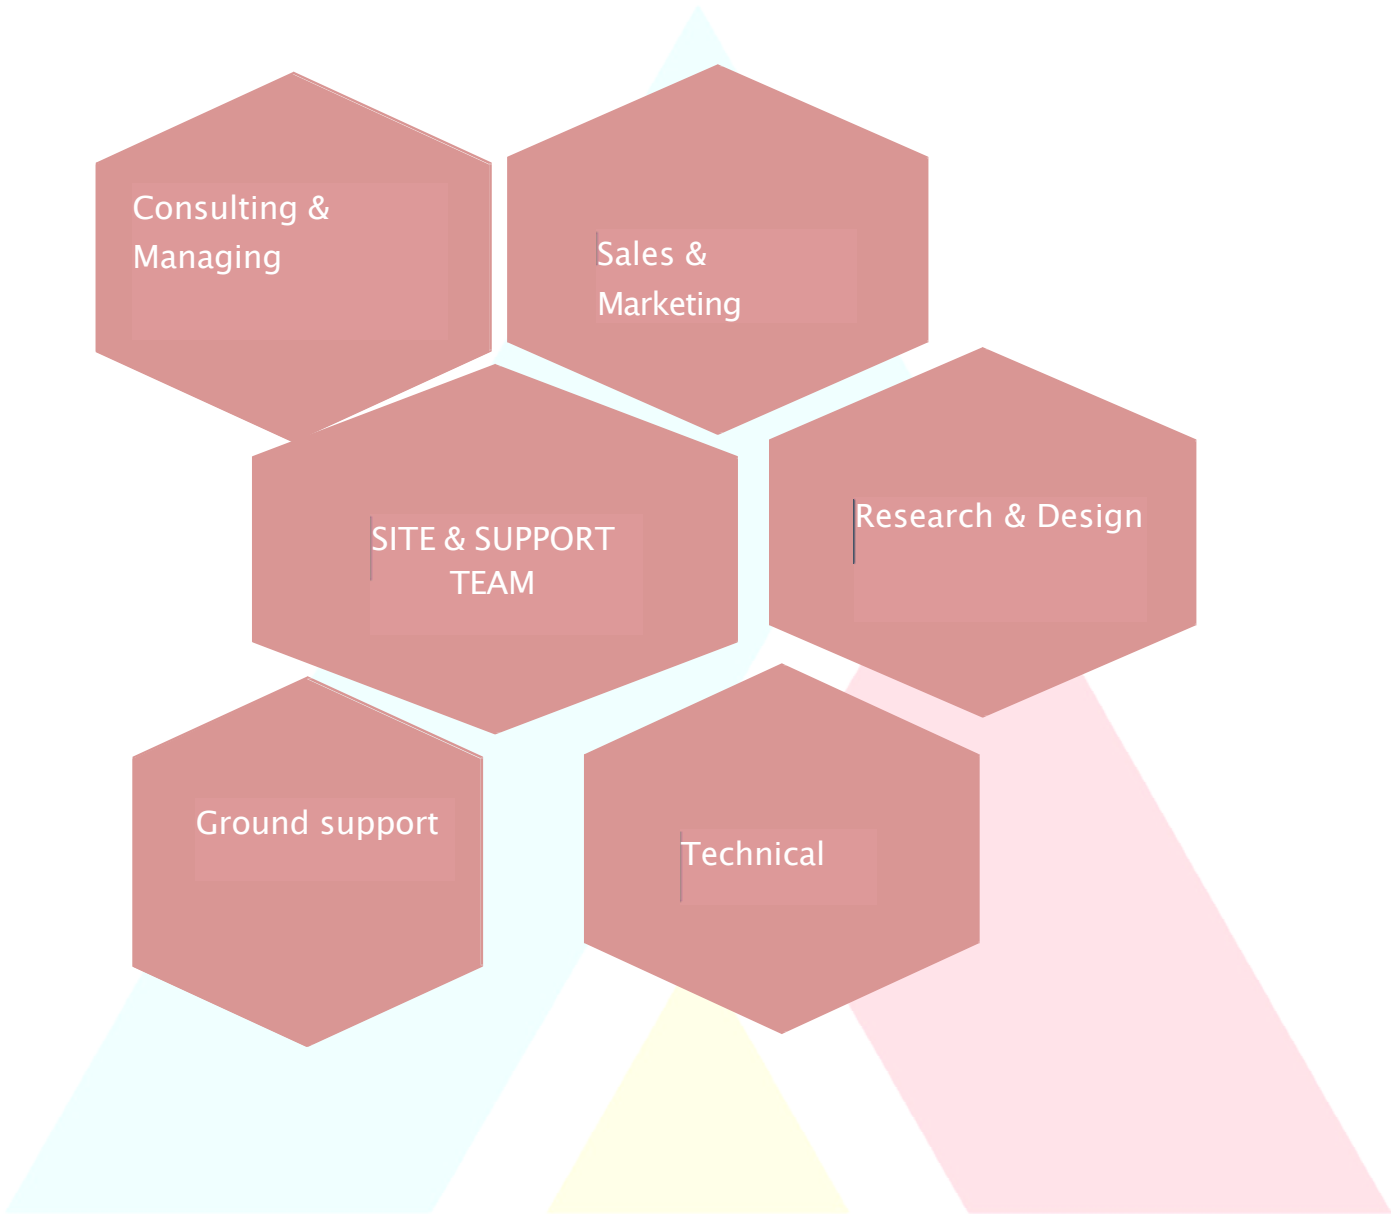

ABTECH SOLUTIONS offers a diverse range of integrated services and solutions to fulfill both individual and business security needs. In essence, we are a professional organization equipped to fulfill the commitments outlined in this company profile. We specialize in customizing ICT and security systems to specifications, whether for the oil and gas, retail, industrial, or financial sectors. Our approach ensures streamlined operations by eliminating conflicting equipment and centralizing information for maximum control.

We guarantee prompt customer service responses, user-friendly equipment, top-tier technical support, and exceptional warranty and service plans. Our dynamic team of experienced professionals remains abreast of the latest technologies and market demands, incorporating cutting-edge solutions with cost-effectiveness to meet the needs of our esteemed clientele.
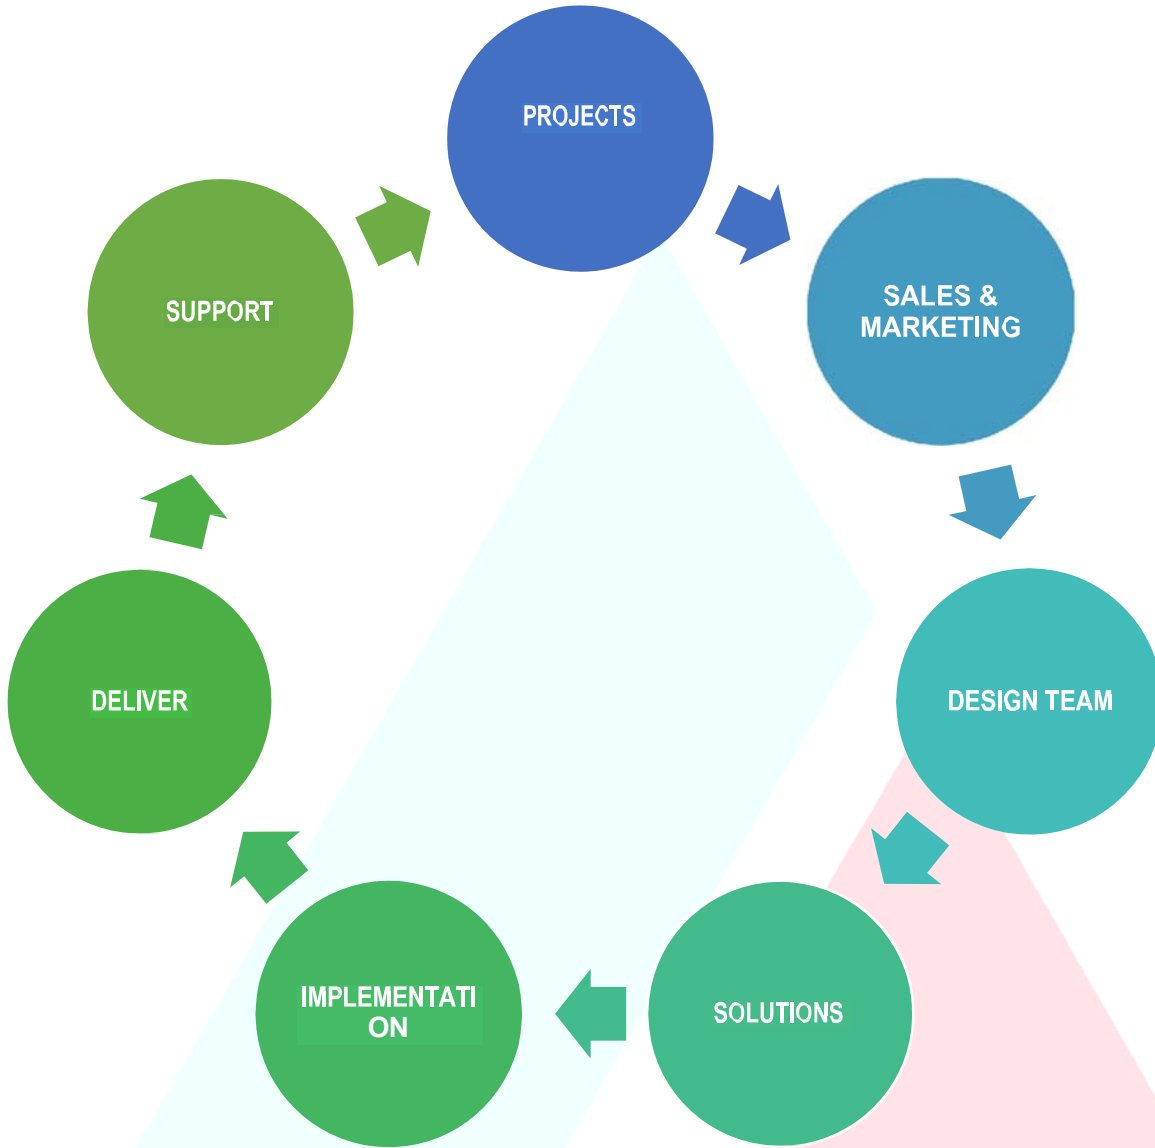

TEAM WORK

We strongly believe that "Success lies in Teamwork" We define the path to follow the project needs and guide lines with our experience and project management.

PPROJECT APPROACH

1. Requirements	2. Designing	3. Installation
Determine needs Install Infrastructure		Design component
Define requirements	Plans & specifications	Install hardware & software
Evaluate alternative	Manage ordering & delivery	Establish framework
4.Configuration hardware	5.Testing & Commissioning Unit tests	Configure
Configure software	System tests.	

OUR PROCESS

Our Strategic Planning Process Is The Key to Successful Business Outcomes

We begin with a consultation and thorough site assessment, followed by a customer security system strategy and design proposal and culminating in an easy hassle-free installation. System training, 24/7 monitoring and support including maintenance completes the process.

The Assessment phase includes deep analysis and understanding of your business infrastructure, we perform a thorough analysis of the client's openly identified and additional unidentified security needs based on which the quotation will be raised.

We assemble a system Design team along with all necessary system design resources. The team follows the client security assessment and strategy proposal developed during the assessment phase to efficiently design a security system platform that meets the client's budgetary and installation timing guidelines.

During the Install phase, our lead installation technicians will implement according to the system strategy and design. Any unforeseen project conditions or client requested system changes identified during the installation phase are fully documented for immediate resolution with the client and reconciliation with the security system strategy and design.

We provide on-going Training and documentation throughout the security system lifecycle to maximize the benefit each client receives from the installed system. We ensure that every system user is fully capable of and confident in using the installed security system.

System activation begins the crucially important monitoring phase; each product will be tested individually to ensure Quality control.

Once your solution has been implemented and secured, we will provide proactive ongoing Support to catch any potential problems before they affect your business. We will keep your network up and running smoothly

CCTV SYSTEM

❖ The use of video surveillance is one of the most exciting and dynamic security solutions available today. Fully digital recording systems can help eliminate your top internal and external risks such as theft, productivity in the workplace, false accident claims and premise liability. Networked digital recorders and networked cameras now allow many video options which were too expensive for most applications just a few years ago.

❖ The experience and knowledge at Signal Systems enable us to assist you with the complexities of selecting a video surveillance solution best for your situation and budget. Signal Systems has partnered with reliable manufacturers to provide you with the highest quality equipment. Consulting with you to design a video system specialized to your business environment is our strong point.

❖ It is crucial to take security seriously in this day and age. It is not just businesses and commercial properties that need good security but it is our homes too. We as a security service company keep in consideration the below points right from the designing of solution till the implementation. We achieve the excellence in our profession with the quality of work and continuous research on the latest products and technology. We always assure the better sales after support to our clients.

- ✓ Prevent Crime
- ✓ Theft Be a useful piece of evidence
- ✓ Help law enforcement solve crime
- ✓ Protecting your staff
- ✓ Monitoring high-risk area
- ✓ Increase customer's confidence

WHY CONSIDER ABTECH SOLUTIONS

❖ ABTECH SOLUTIONS is well established in the U.A.E security industry. With a clear focus on the commercial sector, its customer list includes several household names. It provides a nationwide service, including security for all commercial, retailers and residential clients. We have deliberately set out to be one of the best in the business rather than the biggest, as part of our professional approach we have introduced services of real benefit to customers. We have the best sales after support policy to support the Customer despite the size of the project.

❖ It is our job to make sure that our customers have access to the very latest technology and, even more importantly, that they can get well-informed advice on what will suit their situation best. We are not here to recommend or sell them systems they don't need. We have a reputation for being honest, straight talking and we believe that the relationship with customers should be one of partnership, built on trust, and that's something we work hard to earn.

❖ Looking to the future, we believe that it will be strongly influenced by further advances in technology, if you need electronic security installation and related services for any of your application ABTECH SOLUTIONS will be there with the latest technologies and solutions and sound advice on what you really need to achieve you   way.

- ✓ IP MEGA PIXEL CAMERAS
- ✓ NPR CAMERAS
- ✓ IP CAMERAS
- ✓ NETWORK VIDEO RECODERS
- ✓ DIGITAL VIDEO RECORDERS
- ✓ STORAGE SERVERS

ABTECH SOLUTIONS is an authorized Value-Added Reseller (VAR) for several industries leading card access manufacturers. At ITS, we specialize in more complex enterprise card access applications, especially those involving the integration of IP-based video, intrusion systems, smartcards, human resource databases, etc. Whatever your card access needs, **ABTECH** has the right solution and technical support you will need to complete your project on-time and on-budget. Access control system with full integrated approach has a single view of all your security systems, through use friendly workstations or over secure web links. Features for Access Control System:

- ✓ Controllers from 1 to multiple door controls.
- ✓ Large data storage capacities for graphics, schedules reports, alarms, events, trends, programming and more.
- ✓ Automatic download for data when controller power and communications are restored
- ✓ Rapidly "lockdown" areas and readers and even cards when potential threats are detected.
- ✓ Automatically adjust Access rights when conditions and threat levels change. Secure 10/100 Ethernet communications via IPsec/IKE encryption with hardware acceleration for authentication and encryption
- ✓ Access rights can be defined for each door based on timings, person designations etc.
- ✓ Precise report facility for detecting access at any particular door at any given time to find any culprit
- ✓ System can be directly linked to fire alarm system or BMS to execute the system based on input/output commands.

PUBLIC ADDRESS SYSTEM

ABTECH SOLUTIONS is an innovator in the service of public address systems that provide safety, convenience and keep the public informed through announcements, background and foreground music. **ABTECH** is pioneered the use of very large-scale, centrally controlled distributed loudspeaker systems, and pattern control arrays to that can be designed to deliver intelligible speech and music over thousands of square feet to address crowds & gathering.

WE DESIGN TO MEET THE FOLLOWING MODULES

- ✓ DISTRIBUTED SOUND SYSTEMS
- ✓ CONSTANT VOLTAGE SYSTEMS
- ✓ DISTRIBUTED PA SYSTEM POWERED SYSTEMS
- ✓ IP PAGING SYSTEMS

At ABTECH we can advise you on:

- ✓ Amplifiers
- ✓ Distributed Loudspeaker Design
- ✓ IP Paging Systems
- ✓ Speakers
- ✓ Constant Voltage Systems
- ✓ Full range speaker
- ✓ Large Scale Loudspeaker Arrays

ABTECH is having and expertise quality of providing an electronic sound amplification and distribution system with a microphone, amplifier, and loudspeakers.

ABTECH Consider another important factor of PA system is the spill of the PA system or the amount of sound that is going to an area that does not require PA coverage, maybe a neighbor or adjacent room. A good PA system installation minimizes spill and reflection and the PA system is more efficient and clearer.

ABTECH has and vast experience in PA system installations from the most basic PA system horn speaker or PA ceiling speaker installation through to PA systems in large-scale auditorium and multi-zoned PA system installations.

COMMERCIAL AUDIO & VIDEO

Commercial audio and video systems create environments in your business designed to increase production and privacy for your staff and offers advertising and buying environments for your guests and clients. Professional product lines by Harmon International, JBL Professional, Sharp Audio and Video and Samsung Audio and

✓ LCD televisions / HD projectors
✓ Analog / Digital components
✓ Universal Remotes
✓ Commercial sound masking/music distribution

Commercial A/V systems include some of the most sophisticated electronic equipment and technologies available today. **ABTECH** pride itself not only on our ability to design, install and support these complicated systems, but for our ability to completely integrate and control these very powerful components into a single unified system – easy to use, enormously capable, and highly effective. These integrated systems include:

✓ High-Performance Sound/Audio systems
✓ Professional-grade Video systems including displays, projection systems, smart-boards, smart projection technologies
✓ Sound reinforcement systems

All burglar alarm systems are designed to achieve the same purpose – to thwart a break-in attempt Some burglar alarm systems are wired to all potential entries into the Premises, including doors and windows. Others only detect entry from primary doors. The level of security you prefer for your premise is a matter of choice. The important factor to keep in mind is the programmability of the system.

✓ **ABTECH** selects the panels and keypads based on client requirement.
✓ We have trained and experienced staff for intruder alarm installation and programming.
✓ We verify that the performance of the installed equipment/systems meets with the specified design intent through a series of tests and adjustment.
✓ We Program the system consulting the client with prior discussion
   Our security solutions are scalable to meet the needs of a small company with five employees to a multi-site company with thousands of users. These state-of-the-art burglar alarm systems are able to adapt as technology changes to protect from obsolescence. Only the best of breed non- proprietary components and open software platforms are used. The design of each security system is carefully designed to utilize the most from the existing IT infrastructure. This approach to designing flexible security systems enables budget-friendly solutions that are scalable.

STRUCTURED CABLING SOLUTIONS

- **Networking & IT Solutions**

A structured cabling system provides a platform upon which an overall information system strategy is built. **ABTECH** designs and builds flexible cabling infrastructures – structured cabling systems that support multiple voices, data, video and multimedia systems regardless of their manufacturer. We are a "one-stop-shop" for all your organization
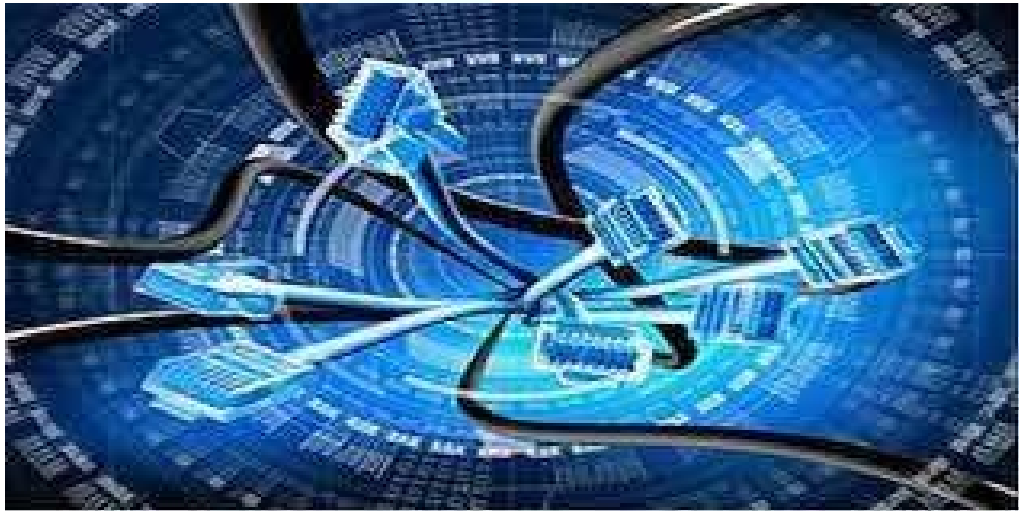

network infrastructure needs. We will help you evaluate, design and install the optimum integrated system for any organization.

- **ABTECH SOLUTIONS** cabling expertise covers:

ABTECH has the resources to work with you in the early planning stages of a project to help guide you in important decisions that have a great impact on the project's success telecommunications room sizes, locations, and quantities. Pathways and cable route. Industry standards and codes. Current and future applications. We have high-performance CAD workstations and state-of-the-art digital scanning and plotting equipment to produce detailed, high-quality drawings to ensure that your installation meets your expectations.

- Implementation

  ABTECH will provide an installation crew to perform: cable placement, termination, splicing and testing services for various types of voice and data cabling. Our technicians and installers use state-of-the-art installation practices, test equipment, and field-proven procedures to ensure the highest-quality installation possible. All installations are fully tested and documented to industry standards such as EIA/TIA, BICSI, and NEC. Our depth of experience with technology and project management allows us to provide the highest levels of service and quality at extremely competitive rates.

- Documentation and Test Equipment

  All projects are carefully tested to ensure that the system is functional and meets predetermined project specifications. At each point of termination, all cable segments are identified and recorded. **ABTECH** uses the latest testing equipment and procedures to verify that each installation meets the ANSI/TIA/EIA and IEEE industry standards. Our array of specialized tools and testing equipment includes Fluke Networks DTX and DSP Series Level III Testers for copper and fiber category compliance testing. To support expansion, reconfiguration and moves, adds or changes, a complete set of "As Built Drawings" and a comprehensive labelling scheme are provided. In addition, complete and appropriate information regarding warranties is delivered.

PARKING GATE SYSTEMS

Your perimeter gate entrances/exits are your first line of defence protecting your property. ESC offers quality gate installation and service of your barrier arms, sliding and swing gates. Our experienced technicians will ensure your system is properly converged with your access control and communications systems, creating an efficient means of securing your property.

ABTECH offers a wide variety of Arm barrier gates & swing and slide gates operators for industrial, commercial and residential applications where protection/privacy, reserved space or traffic flow control is required. Security Barriers are the ideal solution if you need to control vehicle transit in public parking areas, car parks, private and block of flats entrances, even when the traffic is heavy All of our automated vehicular gate barrier system options can be configured to work in many different scenarios and options depends on the requirement of specific clients. some of the technologies used in accessing the controlled and restricted areas through gate barrier are, smart Card Technology, biometric technology, remote opening, push buttons, long range RFID card reading technology.

AUDIO VIDEO INTERCOM SYSTEM

When it comes to designing a functional and effective communication or a security system for commercial applications, ABTECH SOLUTIONS as the options for your need. Whether looking to enhance an existing system or seeking a solution to a problem, ABTECH SOLUTIONS extensive range of

products and design options will help you achieve your security goals. We provide commercial security products that are unrivalled in design. simplicity, technical excellence, and reliability. Featuring intercoms with door release, sophisticated video entry security, and complex microprocessor-based systems, protect your staff by giving them the advantage to safely confirm the identity of visitors and vendors before granting access. By using our products with crisp audio and clear, up-close video images, employees can see and hear who is requesting entry. Unlock the door without getting up! Locate and speak with employees in any part of the building. Page individuals or make emergency announcements using overhead paging systems or

communicate between rooms with our solutions intercoms. Connect multiple buildings for instant communication using an IP intercom.

Answer calls from remote locations to determine if a visitor is legitimate. With video and voice monitoring intercom systems, employees can see and hear individuals requesting access into exposed loading docks, shipping bays, and delivery areas while avoiding face-to-face confrontations.

MASTER CLOCK SYSTEM

The master clock is a programmer designed to transmit reliable, consistent time data to a network of analog or digital LCD and LED clocks. The master clock also programs bell systems, lighting, heating, air conditioning and access control across wired or radio (DHF) networks.

- Advantages of our master clocks

- Automatic time setting on all clocks.

- Identical time on all clocks at the same location.

- Automatic summer/winter time changeover.

- Offers multiple output protocols for time distribution (Impulse, Wireless, NTP, AFNOR, etc.).

NURSE CALL SYSTEM

- ➢ Testing and inspection
- ➢ Critical parts stocking
- ➢ Maintenance
- ➢ Parts replacement
- ➢ Critical parts stocking
- ➢ Equipment replacement

Improve patient satisfaction and employee efficiencies. Our systems are designed to reliably speed up staff response times. We install nurse call solutions that are cost effective, scalable, and state-of-the-art We provide on-going customer training and system updates to ensure these nurse call systems are operating as designed. This helps to maximize system operation. Call us for a no-obligation assessment of your facility. Our service technicians will provide recommendations for your facility that follow the strict national, state and local requirements.

2) MISSION AND VISION

OUR VISION

"Our Vision is existence with excellence in our industry, continuously growing as a market leader with international standards that stand out for providing top-quality services in the field of technology, Our Chairman has instilled the value of to be top on todays and tomorrow's technology to ensure our customers always have the best technology available to them."

OUR MISSION

"ABTECH SOLUTIONS mission is to Emerge and implement top class innovative and cost-effective security solutions to our clients in the Middle East. As Integrator we are determined to be the very best in our business, regardless of the size, pedigree, or inclinations of our competitors. We will continue to bring our industry nuances of style and approaches to projects which are consistent with our evolving aspirations. Above all, we expect to be a credit to the communities we serve, a valuable resource to our customers, and a place where our dedicated Engineering Services can grow and prosper. Towards this end, we will not only listen to our Customers and Manufacturers but embrace the idea that the Company is at their service.

3) QUALITY & COMMITMENT

COMMITMENT TO QUALITY

Quality and Customer satisfaction is our most important guiding principle. In every aspect of our business, we are focused on providing superior product quality and services. We incorporate environmental awareness, as well as the protection and advancement of our employees in all areas. With the aid of this integrated management system and the responsible and considered the usage of resources, we support our customers with the maximum of the process, product, and service quality in growing, moving and forward-looking markets.

Quality Policy

CUSTOMER SATISFACTION

Customer satisfaction is our highest priority. We achieve this goal by continuously improving the cost effectiveness and performance of all our products and processes, as well as focusing on innovation. To deliver continuous improvement, we have created an integrated, global approach that recognizes the interaction of every function and every activity. By integrating systems which increase the effectiveness of our people, our ideas, our processes, and our suppliers, we strive to keep defects, complaints, and impact on the environment to an absolute minimum. This single worldwide performance improvement initiative is called World-Class Performance.

4) LIST OF ACTIVITIES

WHAT WE DO

We are specialized integrators for the ELV solutions & Services. We follow the process innovation to improve, design to change, change to achieve, achieve success. We have always succeeded achieving our client, Happiness.

Dear Sir,

We are glad to inform that **M/s ASIT (ABTECH SOLUTIONS INFORMATION TECHNOLOGY)** is keen to use our (**Legrand Structured Cabling System**) products in their system for the project mentioned above. They are purchasing original and genuine components through our local authorized distributor.

The standard Legrand **Structured Cabling** warranty is applicable for all components against any manufacturing defects purchased from our product range through our authorized distributors provided they are selected and installed as per electrical regulations and Legrand instruction manuals.

As an Installer **M/s ASIT (ABTECH SOLUTIONS INFORMATION TECHNOLOGY)** is responsible for the design, installation, testing & commissioning, and quality of the final product.

We wish **M/s ASIT (ABTECH SOLUTIONS INFORMATION TECHNOLOGY)** all the success for this project.

Thank you for considering Legrand for your development projects.
